

Task 2

What is technology experiment Presentation?

A "technology experiment presentation in PowerPoint" refers to a presentation that discusses and illustrates a technological experiment. In such a presentation, you would typically explain the experiment's purpose, methodology, technologies used, results, and conclusions

To create a Technology Experiment Presentation, these steps are as follow

- Open a Powerpoint and Select a suitable Presentation template according to ur experiment content.
- If u did not select template, Select blank Presentation. Then add any blackground colour or go to design and select any design.
- Create a first slide for introduction, objectives, or technologies used.
- Click on the Insert tab and insert Pictures, flowchart, diagrams or Video.
- Write your text with your Favourite font and colour.
- To visualize data, go to insert tab and use shapes, chart, graph and icons
- After completing your Presentation, go to transition and apply transition on all slide. It make your Presentation more attractive.
